San Francisco District
Regulatory Division**

Interagency Meeting

Thursday, July 12, 2018

1455 Market Street (between. 10th and 11th Streets)
Lobby Conference Room
San Francisco, CA 94103

Conference Call: 888-363-4749
Access Code: 6265590
Security Code: 0718

To Whom It May Concern:

The Corps is holding its monthly Interagency Meeting on Thursday, July 12, 2018. A representative from your agency is invited to attend so that they may hear the project presentations and offer feedback on the issues important to your agency.

The security in this building requires visitor passes to be requested a minimum of 24 hours prior to a meeting. Please indicate with an email or telephone call if a representative from your agency will attend, otherwise they may not be admitted into the building. Once you arrive, please wait in the lobby for a Corps representative to escort you to the meeting room.

The agenda is as follows:

09:00AM – 10:00AM

Project: Newell Creek Dam (NCD) Inlet/Outlet Replacement Project

Applicant/Consultant: City of Santa Cruz Water Department

Project Location: Newell Creek Dam, unincorporated Santa Cruz County

Synopsis: The existing NCD inlet/outlet works is approaching the end of its design life and needs to be replaced due to age and primary deficiencies. The main Project components that would result in potential adverse environmental impacts, including aquatic impacts, are the installation and construction of the intake structure and disposal of associated dredged material, filling in of the seepage channel, construction of a new vehicle and pipeline crossing at the spillway plunge pool, and impacts associated with construction and staging.

10:10AM – 11:10AM

Project: Dunsmuir Heights to Chabot Trail

Applicant/Consultant: East Bay Regional Park District/NCE

Project Location: Oakland, Alameda County

Synopsis: The purpose of the project is to provide a multi-use, unpaved trail corridor connecting the Dunsmuir Heights and surrounding neighborhoods to Lake Chabot Regional Park. The project would rehabilitate and improve approximately 2 miles of existing dirt tracks and construct approximately 1.3 miles of new unpaved trail.

11:20AM – 12:20PM

Project: Codornices Creek Stabilization Project (1231 Glen Avenue)

Applicant/Consultant: City of Berkeley/Harrison Engineering

Project Location: Codornices Creek, Berkeley, Alameda County

Synopsis: An existing mortared stone drop on Codornices Creek has destabilized and the creek is causing damage to the private property improvements at 1231 Glen Avenue. Three alternatives have been developed: a) Concrete Box Drop Structure b) Stepped Gabion Drop c) Steep Culvert.

12:20PM – 1:00PM

Lunch Break

1:00PM – 2:00PM

Project: Terminal Four Wharf, Warehouse, and Piling Removal Project

Applicant/Consultant: CA State Coastal Conservancy/Environmental Science Associates

Project Location: Richmond, Contra Costa County

Synopsis: The project would include the removal of a derelict wharf and warehouse structure and approximately 2,500 piles. Once the piles and wharf are removed, shoreline stabilization may be required to enable habitat restoration and future access and use of City-owned properties.

2:10PM – 3:10PM

Project: Heron's Head Park (HHP) Shoreline Resiliency Project

Applicant/Consultant: Port of San Francisco

Project Location: City and County of San Francisco

Synopsis: The Port of San Francisco proposes to design and construct a living shoreline at HHP that would offer both enhancement of the biodiversity of the site and protection from ongoing erosion and sea level rise.

Questions and/or comments about the interagency meeting should be directed to Bryan Matsumoto at 415-503-6786, Bryan.T.Matsumoto@usace.army.mil, and Myla Ablog at 415-503-6732, Myla.A.Ablog@usace.army.mil
